4. FIRST AID MEASURES

Description of first aid measures

General advice	Avoid breathing gas/fumes/vapor/spray.
Inhalation:	IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If symptoms persist, call a physician.
Skin contact:	IF ON SKIN: Wash with soap and water. Allow warm water to penetrate the bond and gently attempt to remove bonded areas without pulling the skin away from bonded area. If skin irritation persists, call a physician.
Eye contact:	IF IN EYES: Rinse immediately with plenty of water for several minutes. Remove contact lenses, if present and easy to do so. Continue rinsing. Get medical advice/attention.
Ingestion:	Not an expected route of exposure. Ensure that breathing passages are not obstructed. The product will polymerize immediately in the mouth making it almost impossible to swallow. Saliva will slowly separate the solidified product from the mouth.
Self-protection of the first aider:	Use personal protective equipment as required.

Most important symptoms and effect, both acute and delayed

May cause allergic or asthma symptoms or breathing difficulties if inhaled.

Eye:	Irritation, conjunctivitis.
Skin:	Redness, inflammation.
Respiratory	Irritation, coughing, shortness of breath, chest tightness.

Indication of any immediate medical attention and special treatment needed

In the case of lung irritation: Primary treatment using corticoids spray, e.g. Auxiloson spray, Pulmicort-dosage-spray. (Auxiloson and Pulmicort are registered trademarks.)

5. FIRE FIGHTING MEASURES

Extinguishing media

Suitable extinguishing media:	Alcohol-resistant foam, dry powder, carbon dioxide, water spray jet
Unsuitable extinguishing media:	High volume water jet.

Special hazards arising from the substance or mixture

In the event of fire, the following can be released: Nitrogen oxides (NOx), carbon monoxide (CO), carbon dioxide (CO₂).

Advice for firefighters

In case of fire and/or exposure do not breathe fumes. Firefighters should wear positive pressure self-contained breathing apparatus (SCBA). Firefighting operations, rescue and cleaning work under effect of combustion and smolder gases may be done with breathing apparatus. Dispose of contaminated extinction water according to official regulations.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

- For non-emergency personnel: Use personal protective clothing.
- For emergency responders: Ensure adequate ventilation. Avoid contact with eyes or skin.

Environmental precautions

If leakage occurs, dam up. Resolve leaks, if possible, without risk. Prevent surface and ground-water infiltration, as well as ground penetration. Prevent from entering drainage system. If accidental entry into drainage system occurs, inform responsible authorities.

Methods and material for containment and cleaning up

Do not use cloth for clean-up. Flood with water to complete polymerization and scrape up the polymer. Solid material can be disposed as non-hazardous waste.

Reference to other sections

For personal protective equipment see Section 8 and for disposal instructions see Section 13.

7. HANDLING AND STORAGE

Precautions for safe handling

- Advice on safe handling Handle in accordance with good industrial hygiene and safety practice. Avoid contact with eyes, skin and clothing. Avoid breathing vapor and mists. Wash thoroughly after handling. Avoid contact with fabric and paper goods. Contact with these may cause polymerization that can generate smoke and strong irritating vapors, and can cause thermal burns.
- Advice on general occupational hygiene: Wash hands and face before eating.

Conditions for safe storage, including and incompatibilities

Keep in a cool, well-ventilated area away from heat, sparks and open flame. Keep container tightly closed until ready to use. Incompatible products: Do not store together with alkalis.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Control parameters

Chemical Name	ACGIH TLV	OSHA PEL	EH40 WEL
7085-85-0	0.2ppm TWA	----	0.3 ppm, 1.5 mg/m ³ STEL (15 min)

Exposure controls

- Appropriate Engineering Controls: If general ventilation is insufficient to maintain vapor concentration below established exposure limits, use protective downdraft exhaust ventilation.
- Individual protection measures
General protective and hygienic measures Keep away from food stuffs, beverages and feed. Immediately remove all soiled and contaminated clothing. Wash hands before breaks and at the end of work. Avoid contact with eyes and skin.
- Eye/Face protection Safety glasses with side shields or chemical splash goggles.
- Skin protection Do not use PVC, rubber, cotton or nylon gloves.
- Hand protection Tested protective gloves are to be worn: Suitable material: Synthetic rubber gloves. For special applications, it is recommended to check the chemical resistance with the glove manufacturer.
- Respiratory protection If there is a potential to exceed exposure limits, use an approved respirator.
- Environmental exposure controls Do not empty into drains or the aquatic environment.
